Detail Needed Along Source Codes (TONES - Website)

1. **Source Code and Documentation**:
   - **complete source code**, including all scripts, databases, libraries, and assets required to run the website.
   - **documentation** or guidelines for deploying the website, especially. e.g., dependencies, configuration settings, database structure.
   - all **licenses** for third-party tools, frameworks, or libraries are included
2. **Access to Other Resources**:
   - **Database access**: full access to the website's database (and backups) so that the website can be properly migrated.
3. **Hosting Transfer**:
   - full access to the hosting environment, for a seamless transition of hosting or move it to your own server.
